The mean temperature for the week, n Western Oregon was 56 degrees, is 1 degree higher than for the proceeding week and 4 degrees higher than for the corresponding week of last year. The maximum temperatures ranged from 64 to 90 degrees, and the minimum from 48 to 60 degrees. No rain fell during the week. The weather was clear, except for high fog on Wednesday, and or Thursday and Friday mornings.

Fair weather prevailed during the last week and full advantage was taken of the favorable conditions by tillers of the soil. Harvesting is practically over in a few minor sections of the state harvesting will continue for a week or ten days longer. Threshing crews are worked to their utmost, and within a w days threshing will be practically tat. ompleted. The reports indicate that the grain turned out fully as many bushels to the acre as is usual. Outs are dightly discolored, but such discoloration does not affect the quality for feeding purposes. The wheat herry is not as

been injured. Hop picking is practically completed; in a few yards picking will not be finished before the close of the current week Mold increased rapidly, especially in the river-bottom yards, and the result was, the yards had to be abandoned before they were throughly picked. The hops, as a rule, are of good quality; the burrs are very large and the yield generally has been very satisfactory. The total crop will be as large or larger than any ormer crop and the quality is as good as than usual. Pasturage is excellent.

Corn is maturing; it is generally reported to be the best crop ever grown in the state. The total corn crop is not sufficient for home use. Vegetables 'are making excellent

the total product will be much smaller than for several years. The prunes are n excellent condition and a good quality ntinue for several weeks. The apple rop is smaller than for years, though ome orchards show a full crop, Peaches continue to be shipped. Pears are a partial crop; some winter varieties are very full crop.

Sugar beets are being pulled and devered to the factory at La Grande. bout 3509 acres were in sugar beets his year in the Grande Ronde valley. from which 20,000 tons of beets are ex- ing. Stones Drug Storepected; the crop will make about 4,500,-000 pounds of dry granulated sugar.

Stock is in good condition and a plen-tiful supply of hay is on hand for winter of to 61; Walla Walla, 58c, to 50 for new
